**Subject:** Clean up the toxic coal ash lagoons

Aug 15, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Matt Gustafson

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Years ago, when contractors were allowed to haul loads of ash to consumers for driveways and parking lots, there were restrictions on where this ash could be placed. I know this to be fact because we used it on a parking lot in Denver. It had to be so far away from ANY water source and there could be no run off. If there was a concern then about water contamination, why is it not now?

Not only is this affecting the drinking water for thousands, it also affects the fish and wildlife surrounding the water. We no longer swim in Lake Norman or any of the waterways that come off Lake Norman, nor do we eat the fish from these lakes. It's just not safe.

This does not need further study, it needs to be cleaned up!

Thank you.

Sincerely,

Mrs. Robin Barger

Aug 14, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Dear Lisa Palmer, I am a citizen of NC that neighbors the Asheville Duke/Progress plant. I'm asking of you to please have them clean up and move the coal ash ponds into safe dry lined landfill. There are many homes in and around the plant that have drinking wells that could or may already be contaminated with chemicals in coal ash. The beautiful French Broad River is vital to this community and it has already tested and proven to have toxic levels of mercury, lead, arsenic and thallium.

We know all of these chemicals affect the nervous and respiratory systems and causes cancer to many of the organs in people. Please consider all these concerns and thank you for taking the time to read.

Sincerely, Susan B. Fischer 49 Foxberry Drive, Arden 28704

Thank you.

Sincerely,

Susan Fischer

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Miss Florence Arnold

509 Pearl St

In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Samuel Furgieuele

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

I love our watersheds! It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Scott Burns

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Aug 10, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Sam Dillard

2503 Roswell Ave

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

I live on beautiful Mountain Island Lake and demand Duke Power clean up the mess they made. They should of lined the coal ask ponds long ago, now DO NOT let them just walk away and leave the mess for some else to clean up or let it destroy the drinking water for a million people, voters!

Thank you.

Sincerely,

Randy Knotts

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Deby Hodges

Aug 9, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. tucker Bailey

In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Leah Caruana

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Matthew Halberg

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Elizabeth Guzynski

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Bill Hurcomb

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Seriously, have you even been to Asheville the most beautiful mountainous part of North Carolina? Why are we taking a chance with these toxic coal ash lagoons leaking into the French Broad River? This is our river used for recreation by many? And for this pollution to leak into a lake that supplies water for thousands is unthinkable! This MUST be stopped now...forget the study as we already know what is going on. Clean up must begin immediately because any leakage into the French Broad River and Mountain Lake is simply NOT acceptable.

Thank you.

Sincerely,

Mrs. Carol Shaffer

In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Kevin Gregson

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Laura Gleason

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. William Garrard

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Aenia Amin

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Vanessa Gorr

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Greta Hatley

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

My mother and her family grew up and lived in Asheville. I spent many happy hours there as a child. In addition to being a source of drinking water for so many of our citizens, the French Broad is a vital asset to what remains one of North Carolina's most important areas of travel and tourism.

Cleaning up this resource should absolutely be a top priority for our state. For more information about this historic, natural asset, please go to <http://www.blueridgeheritage.com/attractions-destinations/french-broad-river>.

Thank you.

Sincerely,

Mr. Charles Mumford

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

This is very important as we live right at a Duke Energy Plant and our well has been making us and our pets sick. I am having to buy bottled water just for the pets and I live on a very limited fixed income and simply can NOT afford this. And I can't begin to tell you how sick I have been this year and my 19 year old daughter has been suffering from urinary incontinent for about 2 years now. There is arsenic in our well

and arsenic attacks the urinary tract system!!!!!!!!!! There are also

many,

many cases of kidney stones among the people who live near this plant!!!!!!!!

ALL DUKE ENERGY CARES ABOUT IS THEIR BOTTOM LINE!!!!!!!!!!

Thank you.

Sincerely,

Mrs. Barbara Morales

Aug 9, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Rachel Kriegsman

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Gloria Parlier

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

I live downstream from their one outside Blewes Creek Power Station so I definitely am concerned with pollution from Duke Energy. The lake is posted for heavy metal contamination and is abnormally warm.

Thank you.

I am concerned for the health, safety and welfare of my daughter and her family's water supply as they live in Charlotte-Mecklenburg. It is unacceptable that this pollution is allowed to remain so close to the lake, the drinking water reservoir for my daughter and over 800,000 people.

It's time for Duke Energy and DENR to take timely action to protect the French Broad River and Mountain Island Lake and stop delaying the clean up!

Thank you.

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Terry Lincoln

I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

You are going to ignore the needs of the NC people in order that Duke Power can get a pass? Do you think it is right to poison the land and water of people in North Carolina for Duke's power corporate profit?

Who do you work for Duke Power or North Carolina? This will only become a more and more severe problem. Do something now for the people of our state!

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

It's already known that coal ash contains toxic elements, so the time for study is past.

My Johns Hopkins trained cancer surgeon believes that toxic elements in our environment cause many cancers.

Would you like for your drinking water to be polluted? Would you like for your health to be compromised from polluted water?

Don't bow to pressure from business. The health of North Carolinians is more important than more profit for Duke Energy.

Thank you.

Sincerely,

Aug 8, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

Now is the perfect time for Duke Energy and DENR to move aggressively and immediately to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Addie Luther

If these conditions that you have subjected 800,000 people to are not bothersome to you then I challenge you to bring your entire family to these areas and have them drink, bathe and cook using this very water!

If you can't personally accept this offer then these conditions that YOU have created must be cleaned up NOW! I am sick and tired of you corporate companies thinking you're better than everyone else, sitting on your big fat asses drinking your precious bottled water poisoning the rest of us, while we are forced to use your services because of your forced monopoly of our power services. Believe you me, if I had another choice for a power company, I would take it in a heart beat! I am so sick of you corporate assholes that it makes me think seriously of moving to another state that allows for more options in service choices such as power. That's how mad you've made me!

Thank you.

Sincerely,

Miss Jessica Benefield

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Why is it necessary to "study" the polluted water? The facts have been stated..... this water is hazardous to the people of North Carolina and should be cleaned up immediately and measures should be taken to make sure that NC's water supply is not put at risk again.

When will the government, large corporations, committees that are formed to take care of these types of things ( etc ) learn that they are supposed to take care of the PEOPLE of the states in which they are elected or maintain their businesses? If the people in positions of power would just do the right thing by protecting the health of people, preserving our land and wildlife, and not allow greed or corruption to interfere, our state, our country and the world at large would be a healthier, happier and safer place to live.....if only!!!

Thank you.

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Lee White

Aug 8, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Dr. Miriam Sexton

Stop procrastinating and get on with the job! Water is the key source to life. Without it we die. If the water is sick and polluted, we who must drink it will become sick! What is so hard for you to understand?

Please stop the games! Instead of a rate hike, when people get sick from drinking toxic water we should send Duke Energy our medical bills then you might understand?

Thank you.

Sincerely,

Ms. Wilma Mcfadden

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Jennifer Griffith

More study of the problem won't solve the problem, and allowing nothing but study sets a bad precedent for future pollution issues in North Carolina. Do we need the equivalent of a Hurricane Floyd to cause THESE lagoons to overflow? Look at where we are with the hog producers.

'Solutions? Oh, we found some, but they're too expensive. We'd rather just keep doing what we're doing, and hope no one notices...'

Sorry, but we've noticed. The farmers who found creative solutions to their hog lagoon problems (methane as energy) are now facing the Republicans' attempts at dissolving alternative energy funding. Does Skvarla have 'financial interest' in Duke, and that's what's slowing down enforcement?

Thank you.

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Danny Johnson

What is with this State Government?? Water is our most valuable resource. It is rare at times and certainly not a perpetual commodity.

Why would any Government official allow anything /one - as corporations are people too, do anything to jeopardize it's ongoing usefulness. This is ridiculous to allow any party to potentially pollute OUR water source/supply for their own profitable gain. This is not the only business that OUR State seems to take favor on when it comes to misuse of OUR water resources. The current attitude toward OUR water resource only brings us closer to the inevitable water wars that other States are currently experiencing. You don't want others trash tossed in your yard so why allow others to trash our water supply???

Thank you.

Sincerely,

Mr. John & Kathy Schermerhorn

Put political pressure aside and do the right thing for the people that live in the area and those of us who enjoy visiting that area. We the taxpayer are going to pay the price for this either way. Corporation costs to clean up this mess will be passed to us, or as taxpayers' we will pay to clean it up later after damage is done and at twice the cost.

Thank you.

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. David Biesack

In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Eileen Matton

Aug 8, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Erin Williams

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Richard Chadwick

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

This proposed settlement sends a message that it is fine to violate our laws and endanger the health of citizens. The proposed fine is very small for this large corporation. After all, this is a company that in recent years went through a merger that promised to benefit consumers

and stockholders alike. Instead rates have increased and, under this

proposal, they are given a pass on endangering drinking water for a large number of our citizens. It does not take more studies to determine that unlined containment of coal ash already leaking and very close to a major water source is a problem. Common sense alone tells you it is a problem.

Thank you.

Sincerely,

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Amanda Lowe

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

don't this people have children?????????

Thank you.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Please reconsider Duke Energy planned actions & include additional measures to safeguard drinking water resources from possible contamination. Protection is far more economical than clean up & federal/state government fines. Consumer perception is everything to a business. Remain clean & proactive in your consumer awareness.

Thank you for your time expended reading this request.

Thank you.

Aug 8, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Joyce Harrvey

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up! If this was in the back yard of the CEO of Duke Energy and the members of the boards would you not take immediate action to keep your children and grandchildren safe. Some one needs to get off their behinds and do the right thing.

It is now time for the EPA to exercise it's authority under the Clean Water Act to protect our lakes, rivers and streams from polluters.

Thank you.

Sincerely,

Ms. Donna Berg

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Maryphyllis Horn

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up! This is essential to our lives and our children and their children! If not Yours, someones water will be polluted if those lagoons stat leaking or seep into the ground water. Please consider this as a priority... What descisions you make on this issue will provide other companies to be able to do the same! Thank You for your time and attention to this very important issue.

Sincerely,

Marcus A. Frey

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Mary Crews

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

This coal ash problem needs to be addressed through out North Carolina including the Sutton Power plant in Wilmington, NC. The solution is to truck the ash and deposit it back into abandoned coal mines. The ash is about a tenth the volume of the mined coal. The cost to do this needs to be determined, but coal cars currently have to be returned empty.

This is far preferable to just letting it sit where it is currently being stored and leaching into the environment

Thank you.

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Miss Selina Schecroun

Aug 8, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Joy Farlow

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

It is time for Duke Energy to put some of their profits into cleaning up the mess made from their business. It is UNACCEPTABLE for this practice to continue in its' current form. Duke needs to become a good steward of the enviroment and a good community leader.

As for the DENR, you are entrusted to protect the citizens of North Carolina and to say that this proposed settlement does so is complete lip service. I expect you to force Duke Energy to clean up the mess they've made and to ensure that it doesn't happen again. Remember you represent North Carolina not big business.

Thank you.

Sincerely,

Ms. Velvet Key

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Scott Mckendree

Duke Energy is a monopoly which has always put profit before people's health and environmental responsibility. It is time that citizens of

North Carolina stand up to this monopoly and say ENOUGH!! Enough to

blowing off the tops of mountains, enough to coal ash lagoons that are a health hazard to people and animals, enough to contaminating our

water and our air. DENR, demand that Duke Energy accept

responsibility to clean the pollution and move coal ash away from our rivers.

Thank you.

**Subject:** NO COAL ASH IN NC

Aug 8, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Andrew Ittenbach

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Rebecca Cary

Aug 8, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up! If a corporation such as Duke Energy won't act responsibly and fix the problem that it created, then the state of North Carolina, specifically DENR, needs to act immediately to make sure that the public interest is served. For the State to "wink" at Duke Energy and assume that something good will happen in the future to rectify the problem that Duke Energy has already created is not acceptable. What is disturbing, indeed alarming, is Governor McCrory's passed association with Duke Energy and that the current leadership at DENR was appointed by the Governor and appears unwilling to act responsibly based on its own findings concerning the danger(s) of the Duke Energy created coal ash lagoons. In running for office, the Governor insisted that he would be both friendly to business and protective of the public interest. It appears that current DENR policy is consistent with the former but a rejection of the latter. Now is the time for the Governor to comply with both parts of his promise to the people of NC.

Thank you.

Sincerely,

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Donna Sloop

Aug 7, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Daniel Konzelman

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Andrea Rich

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Jocelyn Patterson

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Duke Energy and DENR must stop using pseudo proposals and watered down studies that supposedly would bring about a solution to this grave disaster waiting to happen. Disposal and dumping of toxic chemicals and/or toxic, dangerous by-products of ANY INDUSTRY, including Duke Energy, anywhere NEAR a water source for over 800,000 people is STUPID, CARELESS, AND SHOWING A BLATANT AND TOTAL DISREGARD NEARLY A MILLION NORTH CAROLINIANS' LIVES. Duke Energy, I'm sure, earns plenty of profits to come up with a better solution to this potentially catastrophic ordeal that they find themselves in, and I am also certain that there are enough competent people at the DENR to come up with a solution better AND SAFER than what they are doing now. Or...

Is this whole thing just a matter of corporate greed, and it's underhanded dealings with yet ANOTHER government agency? Stranger things have certainly happened before. The American people are not stupid. They have a pretty good idea about what REALLY goes on in the world of

politics and big corporations. We think it is high time all of you be held accountable for your actions, and the highest levels of the executive American government believe the same thing. Straighten up and fly right. STOP DUMPING IN AND AROUND NORTH CAROLINA'S WATERWAYS, AND DESTROYING MORE OF OUR PRECIOUS AND LIMITED FRESH DRINKING WATER MORE THAN YOU ALREADY HAVE.

Thank you.

Sincerely,

Mr. Tommy Yarbrough

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Joseph Smith

I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

My husband and I have boated on Mountain Island Lake & Lake Norman over the years but have decided we no longer want to expose ourselves to the toxicity of either body of water. Thank you for caring about and prioritizing the health of NC's waters and people.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Alyson Stonebraker

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Duke Energy and the State of North Carolina have placed the use of fossil fuels over the health of the environment and people because of the political influence of an archaic industry and system. The State of North Carolina, and the energy industry, have a moral and social responsibility to act for the benefit of all - to clean up hazardous waste and to develop clean, sustainable green energy.

Instead of following a backward and destructive business model of the old, why not instead be in the vanguard by implementing a green

(sustainable) energy industry in North Carolina? Why not be in a leadership role - be a role model for other states to follow? The potential for a green revolution would be enormous - economically and environmentally. It is a win-win business model.

Duke Energy, you have created this coal ash pollution, it is your responsibility to clean it up. That is in part why your customers pay an electric bill every month. It seems fair and straightward to me. I do not want to drink contaminated water, become ill and unable to work with huge medical bills. North Carolina and Duke, is that the kind of society you want to create?

Thank you.

Aug 7, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Ken Jenkins

Aug 7, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Carl Raymond

1320 Kanuga Rd

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Do you want Duke energy and DENR to be like BP in the Gulf , responsible for billions of dollars in clean up, legal issues, health claims etc because of turning a blind eye to a potentially very serious problem , though expensive now , later will cost much ,much more.

I think the public and government can work with you to off set some

costs. Does Duke have an alternative plan for disposing of the ash

so we do not continue with making the situation worse?

Thank you.

Sincerely,

Mr. Michael Myers

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

How would YOU like to HAVE to drink that toxic, polluted water YOURSELF

- AND YOUR FAMILIES? Do the right thing! Make them clean up that mess before it can get any worse! Toxins in our water supply have ways of becoming toxins in our food supply - pollution spreads when not properly dealt with at once. Show some intelligence and concern for the environment we must all live in - and our children may look back on you with favorable attitudes, instead of cursing the way this was handled.

Thank you.

BTW, Don't waste a stamp and paper to send me a form letter claiming you're looking into this matter - just DO IT. If it's taken care of, I'll know - as will everyone else this impacts!

Thank you.

Sincerely,

Dennis Wyndamere

**Subject:** Duke-DENR Deal

As a North Carolina native, tourist to the French Broad River area, and a human who needs drinking water to survive, I am pleading with you, Lisa Palmer, to take the right stand against the Duke Energy and DENR deal that allows the dumping of millions of tons of toxic coal ash into lagoons along the French Broad River. It is your responsibility to hold a public hearing on the proposal so the public's voice can be heard. It is your responsibility to stop the pollution of over 800,000 North Carolinian's drinking water. It is your responsibility to protect the people, land, and economy of the French Broad River area. By allowing the French Broad River and Mountain Island Lake to continue to be polluted does nothing but harm North Carolina's people and ruin the North Carolina Department of Environment and Natural Resources credibility. I am unfortunately given no options for my energy provider. Sure, I can join Energy United but for what? To pay a membership fee for electricity purchased from Duke Energy owned plants. The MONOPOLY that has been forced on NC citizens is illegal. Do not make us drink Duke Energy waste as well!

With much thought,

Sarah Moore

Concerned, Voting North Carolina Citizen

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Vivian DeMarco

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Kathryn Pezzi

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. M. Ann Floyd

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Kaaren Stoner

Aug 7, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Aug 7, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Dr. Robert Louttit

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

No profit for your company or its shareholders is worth this risk.

Thank you.

Sincerely,

Ms. Mary Mullin

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Amy Van Devender

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Hugh Partridge

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

I really would be curious to know why you are asking for study only.

It seems as if you already have a lot of information on the situation.

Can you please inform me as to the reasoning? Thank you for your response.

Thank you.

Sincerely,

Dr. Carol Clark

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

The kinds of decisions North Carolina government officials are making for North Carolinians has become the object of American comedians'

scorn and ridicule. Make a good, logical, realistic decision and cast North Carolina in a better light. None of us want to drink tainted

water, not even Duke Energy officers. We also don't want to be the

objects of national ridicule. We want to live in a state we can be proud of and one that values clean air and water.

Thank you.

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Ronald Monti

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Tammie Polityka

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Shannon Burgess

Coal ash treatment and continual monitoring and cleanup should be the responsibility of the utility that created the waste. Duke Energy has the resources to do this, and they should be held accountable. Just because the Governor is a former employee shouldn't mean that they should get a pass on this responsibility!

Thank you.

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Dinah Pinney

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Really! It's time to protect the citizens of North Carolina!

Thank you.

Sincerely,

Ms. Mary Elizabeth Rodgers

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Nicole Lindahl

This is unacceptable to allow Duke to get away with a fine. They need to take full accountability and responsibility for poisoning NC drinking water with their toxic coal waste. We have enough issues with chemicals/additives in our food but drinking water should be safe. I wouldn't want a stranger or their kids drinking poison, hopefully you agree and will prioritize this matter asap, thanks.

Thank you.

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Michael Dunn

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up! What we are leaving our children in the way of a toxic planet is hateful, unethical, and worse, because this is preventable. We already know that these toxic chemicals contribute to cancers, and are even present in mother's milk. Is this good corporate citizenship? Why don't we give a damn about future generations? There are hundreds of studies out there

- you don't need a PhD to understand that if you drink poison, and the whole food chain is involved, we are simply setting ourselves up for a slow and ugly mass suicide. We are have the choice to be a force for good or a force for evil. We can worship the dollar and pretend we love God, or we can show our love for creation by loving and preserving this beautiful and life SUSTAINING miracle.

Please do the right thing, for your family, your children and the unborn generations who will either thank you for your wisdom or despise you for your selfishness.

Thank you.

Sincerely,

Ms. Lois Gatlin

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Shevon Hinson

In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Larry Cooper

Deciding to do a study just prolongs the problem. It is wasted money when we already know what needs to be done. Enact rules to stop runoff of coal ash into the lakes and rivers that we drink from. Please!

Please! Please!

Thank you.

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. William Nichols

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Please.

Thank you.

Sincerely,

Ms. Amber Weifenbach

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. David Fullam

I don't know how things worked around your house when you were a child, but when I made a mess I cleaned it up. I didn't leave it for the neighbour's kids and I certainly didn't leave it for the city to come around and pick it up for me. I cleaned up my own mess. Let me repeat that, I cleaned up my own mess. Why should Duke Energy be any different? Don't spare the rod, don't spoil the child. Let this spoiled child clean its own mess as soon as possible with no excuses. It's just that simple.

Thank you.

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Diana Haywood

As a fairly recent resident of Charlotte I have been dismayed to read about the toxic coal ash lagoons threatening the drinking water of

800,000 people. I am astonished that North Carolina would settle for a "study" rather than a cleanup. I hope that you will press to have this urgent matter resolved.

Thank you.

Corporations should NOT have the right to pollute ground water in the State of North Carolina.

The proposed settlement amount is a token of the cost in dollars and the human health risks associated with polluting our water supplies.

A simple test will show what this means.

Would you want your own children to drink this polluted water, bathe in it, and play in it?

If not, why should the citizens of North Carolina be forced to do so?

Thank you.

Sincerely,

Mr. Jim Myers

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up.

Thank you.

Sincerely,

Mr. James Schall

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

They get away with more by the saying "It is easier to ask forgiveness than ask permission " far less consequences and work for Duke Energy! Stop this nonsense! Stop slapping the child on the hand and letting them think about it. There has to be greater consequences that the child (company) feels in order for them to stop the bad behavior.

Thank you.

Sincerely,

Mrs. Laurel Callis

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Ann Fawcett

**Subject:** Coal Ash

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up! I think far coal is burned, it turn to a sulfur compound. I'm allergic to sulfur . With this being released into our drinking water,lakes and stream, I can't swim in my community lake. I can't drink the tap water.

Please find another use for the coal ash. Clean up oil spills with it, find another place.

Thank you.

Sincerely,

Mrs. Tona Gordon

Aug 6, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

The Gaston Gazette writes: "The proposed settlement does not stop the ongoing, unpermitted pollution of ground and surface waters. Nor does it clean up the 71 acres of unlined coal ash lagoons propped up 80 feet above the drinking water reservoir for 860,000 people in Gastonia, Mount Holly and Charlotte-Mecklenburg. With drinking water intakes immediately downstream of Riverbend, the proposed settlement leaves these waste lagoons and their unpermitted waste streams flowing into groundwater and Mountain Island Lake."

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. William Gupton

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. David Hearn

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

As a native to Western North Carolina I am alarmed by the ongoing neglect for our mountains and streams in the region. The French Broad is the 3rd oldest river in the world and the quality of water effects the animals as well as people in our region. The Mountain Island Lake is also a source of drinking water for hundreds of thousands of North Carolinians. As a RN in the community I am personally concerned for the immediate safety of the adults and children subjected to the toxins of the coal ash lagoons! Making a financial settlement is not enough for the people here in the region. We demand the end to pollution of our ground and surface waters and the immediate cleanup of the 71 acres of unlined coal ash lagoons in NC.

Please understand that this not only effects the ground water and earth around us but will eventually get into our own drinking waters and soils which has a detrimental effect for the development and health of children and adults who are exposed to this!!

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mrs. Korah Schwab RN

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Kathy Wright

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Denisha Gregory

Duke Energy's Mission Statement includes how much they appreciate their customers and will strive to provide clean energy at reasonable prices,

knowing that many of them are living in poverty. Surely Duke Energy

wants to do what is "right" for the health and well-being of those same customers.

Thank you.

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Doug Roaten

President Obama, most of the Senators, Congress people, Governors, and state leaders are Christians. Christianity teaches that the natural world called the Garden of Eden was created by God in a purity to last forever. Also, support human life to ultimate health.. It is the responsibility of present day Christians to respect and honor god's original plan. The sun and wind can power the whole planet with nature friendly strength

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Marsha Johnson

**Subject:** A problem with ash....

Aug 5, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Dr. Tim Plonk

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

It is time - time for the energy producers in the United States to start conducting their business in an environmentally responsible way.

With the incidence of asthma and childhood cancer on the increase, Duke Energy will only be made the scape goat and justifiably so, if profits to shareholders are put ahead of the concerns of their customers.

Thank you.

Unless proactive steps are taken, North Carolina will lose its reputation as a great State in which to live. The environmental amenities here attract new residents and businesses to become permanent productive assets to our State as well as attract millions of visitors who spend their vacation dollars. We should all strive to minimize polluting our fields and streams and such a philosophy should be supported by our legislators.

Thank you.

We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Hoyle Purvis

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

There is absolutely no excuse for the delay in cleaning up the pollution that Duke Energy has caused to the French Broad River and Mountain Island Lake. Over 800,000 North Carolinians rely on that water source to survive. It's inhumane to not only allow this delay, but to allow Duke Energy to continue their environmentally damaging ways. PEOPLE OVER PROFITS!!!!

Thank you.

Sincerely,

Aug 5, 2013

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Mr. Thomas Harris

In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Ms. Patricia Boll

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Studies are good at times YET when there are unlined lagoons with toxic coal ash in them CLEAN UP is what is needed. And with a water source near by too...Duke Energy HAS to clean this up now.

It amazes me that this is even a topic of debate or that we have to email & ask for this to happen.

Too many corporations get away with such dangerous & willfully ignorant behavior that endanger others.

I ask you to make Duke Energy do the right thing in this matter.

Thank you.

Thank you.

This coal ash pond, and all coal ash ponds in general, are a ticking time bomb. Energy companies make tons of cash and they should be using that cash to properly dispose of coal ash, not storing it beside any sources of water, much less the water source for Charlotte. Part of me hopes the pond has a catastrophe so then government will actually do something about it, and other coal ash ponds, because it's obvious government sides with businesses until a catastrophe happens and they're staring over a cliff at death.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Ms. Lisa Palmer, N.C. DENR Division of Water Quality

1617 Mail Service Center

Raleigh, NC 27699-1617

Dear Ms. Palmer, N.C. DENR Division of Water Quality,

I am opposed to the Duke Energy and DENR settlement regarding the pollution of Mountain Island Lake and the French Broad River from toxic coal ash lagoons. In DENR's filing against Duke Energy, it was noted that the unlawful pollution "poses a serious danger to the health, safety and welfare of the people of North Carolina and serious harm to the water resources of the state", yet the proposed settlement asks Duke Energy to simply study the pollution. We need a settlement that moves polluted coal ash away from the French Broad River and Mountain Island Lake and stores it safely in a dry lined landfill. I urge DENR to hold a public hearing so that the public's voice can be heard on this critical issue.

It's time for Duke Energy and DENR to take immediate action to protect the French Broad River and Mountain Island Lake (drinking water reservoir for over 800,000 people) and stop delaying the clean up!

Thank you.

Sincerely,

Dr. Karen Jost

**Subject:** DENR-Duke Energy Coal Ash Pond Settlement at Mountain Island Lake

Dear NC DENR,

I'd like to register my comment regarding the recent settlement by the NC DENR of its lawsuit against Duke Energy concerning their Coal Ash ponds at the idle Riverbend Steam Station on Mountain Island Lake. To say I am disappointed by the terms of the settlement would be an understatement. A fine of such small scale compared to the past and current damage to the environment around these ponds by Duke's activities is difficult to reconcile. That NC DENR would also require what amounts to no action by Duke to remedy their negative impact on our lake and drinking water is unbelievable.

I live on this great lake and enjoy many kinds of recreation on its water. But my enjoyment of the lake is vastly diminished due to my concerns about the many contaminants currently being leaked into its water. This is to say nothing of the pollutants that have been dumped there for the last seventy-plus years by Duke, a violation that shouldn't be settled with a slap on the wrists and a request for further study of their pollution by themselves. Any study should be done only by an independent agency. Why would DENR ask the fox to check the locks on the hen house?

What's wrong with the proposed settlement?:

- The Duke-DENR deal **does not stop the pollution of Mountain Island Lake and groundwater** – it lets Duke continue pouring contaminated water into the Lake and groundwater that will eventually reach the lake;
- The Duke-DENR deal **leaves 2.7 million tons of coal ash in unlined leaking lagoons on the banks of the drinking water reservoir for Charlotte-Mecklenburg, Gastonia, Mount Holly** and other municipalities those systems serve;
- The Duke-DENR deal **only requires more studies instead of cleanup**, when DENR and Duke have known about the pollution for years and have done nothing to stop it;
- The Duke-DENR deal includes **only a token fine of \$36,000 that forgives years of documented illegal pollution** by this multi-billion dollar company.

We need a public hearing on this settlement so the people who live near and play on and drink the water from this lake can be heard about how the settlement affects them. We need Duke to clean up the coal ash ponds and remove the coal ash pollution they have dumped in our backyards. We need the drinking water supply for over 800,000 people protected now and into the future by eliminating the multiple threats of the ponds and their contaminants from the shores of Mountain Island Lake. We don't need further study by Duke Energy of a problem caused by Duke Energy with no mandate to do anything about the problem. All the study in the world will not change the fact that we have a ticking time bomb on our lake. We don't need a fine that is so trivial that

it does nothing to discourage future illegal pollution and makes it more cost effective to pollute than be environmentally responsible.

Thank you and I look forward to seeing NC DENR and Duke representatives at the public hearing on this settlement.

Regards,  
Randy Miller, Mountain Island Lake Resident
